Parrot
MINIKIT

High-fidelity sound

The Parrot MINIKIT is a *Bluetooth* hands-free kit. It features the very latest generation of DSP-2 signal processing algorithms and a high-definition 2W speaker for crystal clear conversations in any situation.

It follows you everywhere

It attaches to the car's sun visor and can easily be slipped into your pocket thanks to its small size and lightweight design - a mere 104g. It has its own battery, offering 10 hours' talk time and over a week on standby.

It recognises your voice

The Parrot MINIKIT is designed to simplify your calls via the user-defined voiceprints (max. 150/phone). It uses its own, not the phone's, voice recognition feature, thereby avoiding any need to handle the phone whilsit in the car for greater safety at the wheel.

A universal *Bluetooth* solution

The Parrot MINIKIT hands-free kit is 100% *Bluetooth* compatible; therefore if works with practically all *Bluetooth* mobile phones.
